

Date: 10 February 2018

Dear Residents,

Warning About Fake Notices

Notices claiming that our water is "contaminated with poisonous substance" and that "unidentified gas" is present in our pipes (refer to the attached photo below) were pasted on some of your doors.

Residents need not be alarmed. These claims are unfounded and the notices were not sent by the Town Council. The water is not contaminated with poison nor is there any unidentified gas in the pipes.

The PUB has tested the water samples from the block and water quality is within normal range and safe for drinking. No security breaches to the water supply were detected by the SPF.

In addition, the PUB inspected the pipes and no sewage leaks were found. The SCDF was also mobilised to check for gas leaks and none were detected.

Police investigations into this incident are ongoing.

The Town Council urges everyone to refrain from putting up and/or sending such notices.

Should you spot such notices, please contact us at 6453 0511.

Thank you.

Ang Mo Kio Town Council
