On 18 October 2018, about 100 students from Pro-Teach Schoolcare (Fernvale) were educated on estate issues by AMKTC and expressed what they learnt via artwork. The designs were made into posters. They have been put up around Sengkang!

How to Recycle

1 October 2018
The Little Skool House (At-the-Hub)

A total of 50 children from The Little Skool House At-The-Hub designed interactive display boxes as part of the Town Council's initiative to promote recycling. The experiential outreach program enabled the children to learn more about recyclable and non-recyclable items in a fun way. The creative works of these children will become a part of the Town Council's roadshow events display as interactive game sets. Do look out for the displays at future events!

Cleaners' Appreciation

20 September 2018
Da Qiao Primary School

On 20 September 2018, students from Da Qiao Primary School presented 86 hand-drawn bags to our cleaners. Often, we are too busy to notice the effort put in by our workers in cleaning up the estate. Realizing this, the students designed the bags as a token of appreciation to recognize the cleaners' hard work. We definitely appreciate the kind gesture of the students!

Interactive Recycling Bin Project

27 August 2018

Teck Ghee Primary School

As part of a community project, students from Teck Ghee Primary School exercised their creativity to decorate three recycling bins so as to encourage residents to recycle their unwanted items. A big thumb's up to the students for their efforts! The bins were handed over to the Town Council on 27 August 2018 and are currently placed at Blocks 351, 352 and 353 Ang Mo Kio Street 32. We hope that these bins will encourage everyone to Reduce, Reuse and Recycle!

Indiscriminate Bicycle Parking

25 May 2018

Xinmin Secondary School

On 25 May 2018, students from Xinmin Secondary went around blocks near their school to distribute brochures on indiscriminate bicycle parking. The initiative aimed to help educate residents on the proper parking of bicycles so as to prevent safety hazards such as obstruction from occurring. We thank the students for spreading awareness of the issue to residents!

Recyclable Collection

22 May 2018
Anderson Secondary School

Students from Anderson Secondary School participated in a recycling drive involving residents from a total of 14 blocks in our precinct. Prior to the drive, the students had distributed flyers and recycling bags to residents' houses on 10 March 2018 to encourage residents to contribute to the project. In total, about 600kg of recycled items were collected!

Keep Clean Singapore 2018

May 2018

Various Organizations

As part of the annual Keep Clean Singapore movement, Ang Mo Kio Town Council coordinated with several organizations to organize litter-picking events in our precinct. We partnered with schools such as Anderson Secondary School, Tech Ghee Primary School and Da Qiao Primary School, as well as the Peoples Association (PA) and Residential Committees (RCs), to conduct community litter picking exercises around the estate. We thank all participants for helping to make the estate a cleaner place for everyone to live in!
